

Join us for a
free seminar:

AUTOMOTIVE WEATHERING & CORROSION TESTING

Presented by:

*20 years of Q-Lab and
Venture's Partnership*

Every day, accelerated weathering, light stability testers and corrosion testers help R&D, quality control, and new product development engineers improve their products, minimize failures, and reduce raw material costs.

During this seminar, we will:

- Understand how sunlight, heat and water damage materials.
- Compare fluorescent UV vs. Xenon Arc weathering tests.
- Explain best use of key accelerated weathering technologies & correlation examples.
- Review key international weathering test standards.
- Discuss the role of modern corrosion testing & correlation examples.
- Introduce the new Q-SUN Xe-8, a large-capacity rotating rack xenon arc tester.
- Live Demo of Q-SUN Xe-8 from Q-Lab headquarters (USA).

Introducing the
ALL NEW
Q-SUN Xe-8

Date: 10th June 2025, Tuesday

Venue: Hablis Hotels, 19 GST Road, Guindy, Chennai 600 032

Time: 9:30 am to 5:00 pm, with coffee and lunch break
